

COVID-19 UPDATES

At Dr. Zugner and Pedersen's Dental office we put patient and employees well-being first, with this said we have decided to close our office for the next 3 weeks effective immediately. In accordance with ADA recommendations. Given these circumstances we are currently only seeing patients who need emergency, no-elective care.

We plan to re-open the office as soon as we are able to.

Our office will be operating to treat patients with the following symptoms:

- Severe tooth pain
- Swelling in your mouth, face or neck
- Bleeding in your mouth that does not stop
- Infection or substantial risk of it
- Trauma

In emergency, non-elective care situations, patients can have every confidence that Dr. Zugner and Pedersen are following the guidelines set by the American Dental Association and the Centers for Disease Control and Prevention.

- Offices are following the precautionary standards set the CDC to help prevent the spread of the virus.
- For our patient's protection, Dr. Zugner and Pedersen are unable to treat patients who arrive and present with a fever, cough or other flu-like symptoms even in an emergency situation. These patients should contact their health care provider.
